Oak View Elementary School, through a grant from the Bloomfield Educational Foundation and the enthusiastic support of first-grade teacher Judith Gibbs, will present its first Hands-On Family Fun Science Night. The event will be Thursday from 6:30 to 8:30 p.m., said school Principal Julie R. Andriolo.

Students from kindergarten to sixth grade will be given the opportunity to display their science projects. All Oak View students and their families will also be able to enjoy an array of hands-on science activities that will address earth awareness, simple machines, sound, planets, the five senses, weather and natural disasters. During the week leading up to Science Night, the school presented several schoolwide activities designed to prepare students for this event.

School counselor Rebecca Haim will oversee Oak View's K-Kids as they explore sun prints with their lower-grade "buddies."
